CA Senate Testimony Exposes What "Gender Affirming" Care Really Is

Dr. Michael Laidlaw, endocrine glands and hormones specialist, has been an ally in our fight to stop AB 2119, a bill that pushes puberty blocking drugs and sex change operations on foster kids with gender confusion. We were glad to have his help several weeks ago to explain to legislators what is meant by "gender affirming care," something being guaranteed to foster kids in AB 2119.

AB 2119 was Approved by Governor Brown on September 14, 2018.

Although "gender affirming care" sounds gentle and healing, here is a short list of what it includes:

1. Powerful, dangerous hormones to block kids normal puberty;
2. High dose, high risk sex hormones with deadly blood clot and cancer risks;
3. Hazardous surgeries for boys to turn intestines into imitation vaginas, while destroying the penis and removing the testicles;
4. Breast binders and mastectomies to destroy teenage girls healthy breast tissue; Ovary and uterus removal ensuring sterility.

Despite Dr. Laidlaw's warning, AB 2119 was approved by the Senate Judiciary Committee by a vote of 5 to 2. **Watch** his two minute testimony:

The bill will now be heard in the Senate Appropriations Committee on August 6. **Call committee members** and tell them to vote no on AB 2119.
